

# Linux/Ubuntu Wireless Connection Guide

June 21, 2012

1. Choose ASHS-Students from the list of Wireless Networks

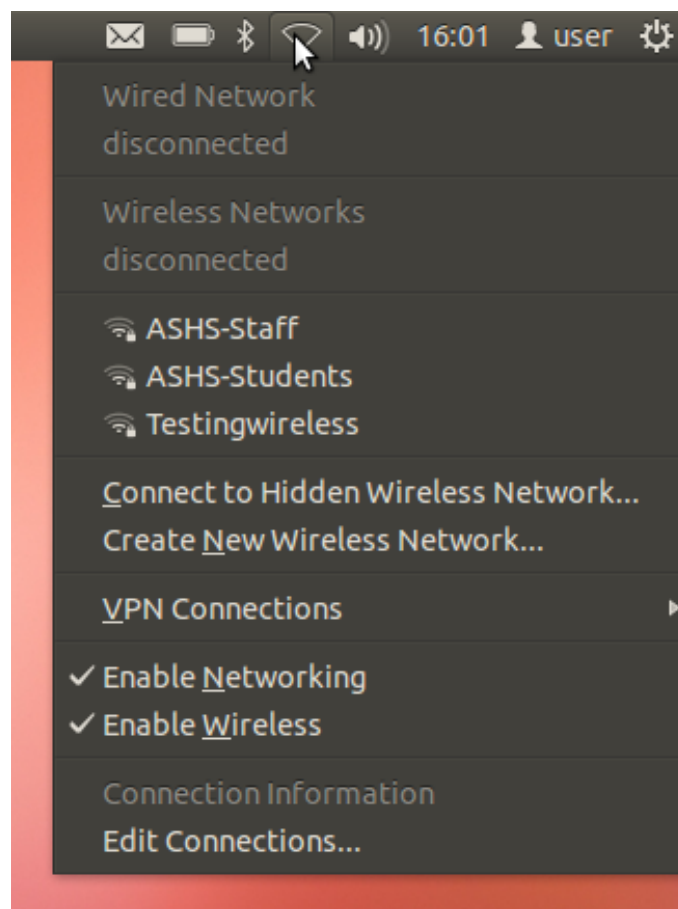

Figure 1: Select ASHS-Students

2. In the pop up box set Authentication to be “Protected EAP (PEAP)”
3. Set inner authentication to be “MSCHAPv2”

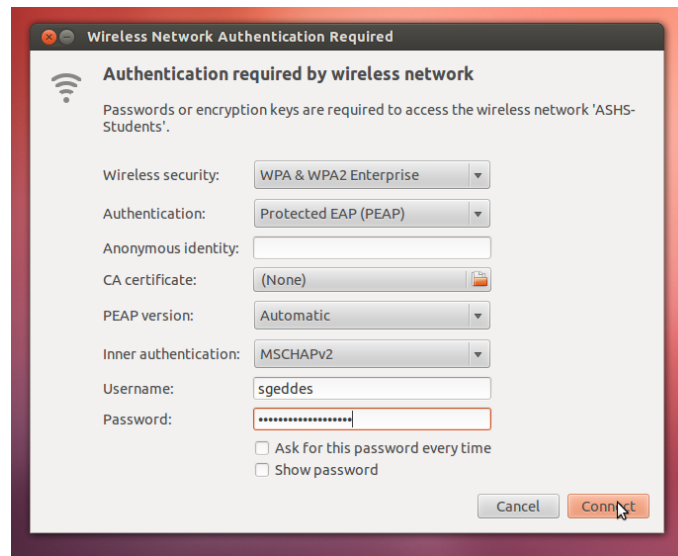

Figure 2: Fill out the Required Fields

4. Choose Ignore on the warning box that opens up and check "Don't warn me again"

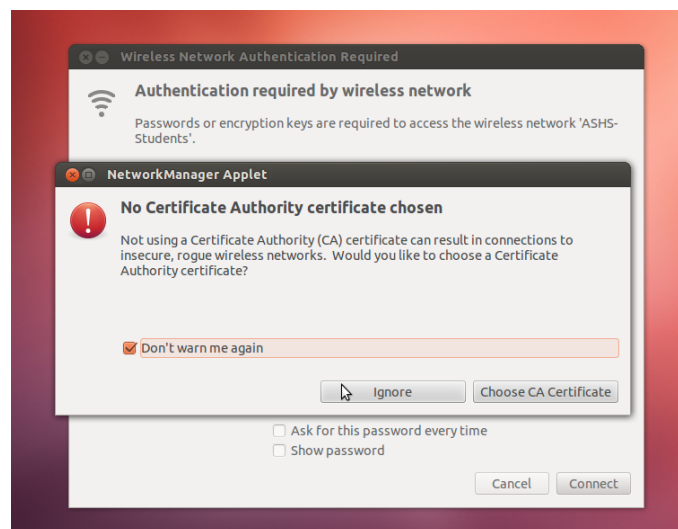

Figure 3: Enter Username and Password

You should now be able to enjoy wireless on your laptop. Contact the IT Help Desk if you have any problems.
